### EXPERTISE

Microsoft Office

HTML

CSS

JavaScript

PostgreSQL

Python

### STATEMENT

I am purpose driven and always eager to learn and adapt to my current working environment. I recognize the need for continuous self-improvement and therefore try to always keep abreast of the latest trends and technologies. Due to my years in the banking industry, I have picked up various skills, both technical and soft skills. These include COBOL & DB2 to the latest web-based technologies and SAFE Agile practices. This has allowed me to not only achieve and surpass team-based goals and business problems, but also individual ones as well. I have proven to be adaptable and comfortable with change.

### EXPERIENCE

#### Software Developer

**Conclude** / South Africa / 2021 - Present.

I work on projects that involve a mixture of technologies including Angular 11, Firebase and Nodejs additional tasks include API design, User interface mock-up and design. The project(s) requires me to:

- Attend daily stand ups and play a role during sprint planning.
- Work in a team to break down task into sub tasks to clearly define requirements.
- Make use of the following tools (but not limited to); POSTMAN, Freshdesk, and Firebase.

#### Software Developer

**Platinum Life** / South Africa / 2019 – 2020.

Worked on developing a web-based applications system for the New Business department to replace current batch cleaning system for eventual migration:

- Technologies used include Angular 8+, Asp.Net Core, MSSQL Server, Bootstrap 4/Angular Material, C#, JavaScript, Azure DevOps, IIS, Git

#### Web Applications Developer

**Standard Bank – PBB IT Rest of Africa** / South Africa / 2016 - 2019

Worked in the Africa space as a web applications developer using various technologies such as AngularJS, NodeJS, Loopback, Docker, etc. My Responsibilities include:

- Leading regular stand up meetings and documenting blockers and incidents as part-time scrum master.
- Facilitated in the planning and coordinatization of pre-PI and PI planning sessions for work to be done in future iterations.

#### COBOL Developer

**Standard Bank – PBB IT Credit Technical** / South Africa / 2012 - 2017

Worked as a COBOL developer dealing with JCL code generation, maintenance and testing of existing code. My Responsibilities included:

- Scoring of PROBE countries on a month-to-month basis to ascertain credit worthiness of the bank's clients.
- Deployed decision agents into production to help in the scoring of countries. This included the rolling out of new countries to be scored unto the PROBE system.
- Participation in UAT and SIT testing.

#### Intern/Graphics Designer

**CoachLab** / South Africa / 2011 - 2011

Participated in team building and leadership exercises whilst working on innovative projects and prototypes. Was also able to network with other entrepreneurs and business leaders.

My responsibilities included:

- Working as a team lead to design a GUI for an electric car concept; whilst resolving issues relating to design and placement of GUI.
- CoachLab in conjunction with DEGW tasked us with a data capturing exercise at the Standard Bank Head office for time and space allocation.

---

## Intern/Motion Graphics Designer

**Missing Link** / South Africa / 2009 - 2009

Worked as an animator specializing in 2D and 3D animation for various commercial clients and NGOs. My responsibilities included:

- Designing promos and intros using built story boards and sketches to accompany pitch ideas.
- Participated in training workshops and presentations.
- Acted as backup to lead designer.

---

## ACHIEVEMENTS

### Promoted to Junior Manager Level.

**Standard Bank** / 2018

After being recognized and surpassing or matching KPIs, I was put forward for a scale movement from general staff to junior management level.

### Became Lead developer of PROBE scoring project.

**Standard Bank** / 2017

At the recommendation of the project manager, I was tasked with leading the PROBE scoring project as lead developer until handover.

### Offered permanent position at Standard Bank.

**CoachLab** / 2011

Standard bank being one of the sponsors of the internship program at CoachLab offered me a permanent position at their organization through their graduate program.

---

## SOCIAL RESPONSIBILITY

### Web development

**Solidarity Eswatini** / eSwatini / 2020

Solidarity Eswatini is a mutual-aid action group focused on resilient, sustainable, and creative community projects. During the beginning of the onset of the COVID-19 pandemic they were one of the first organizations in eSwatini to help those that were adversely affected. I provided my technical skills by creating a WordPress website for them, so that they would have a greater online presence.
